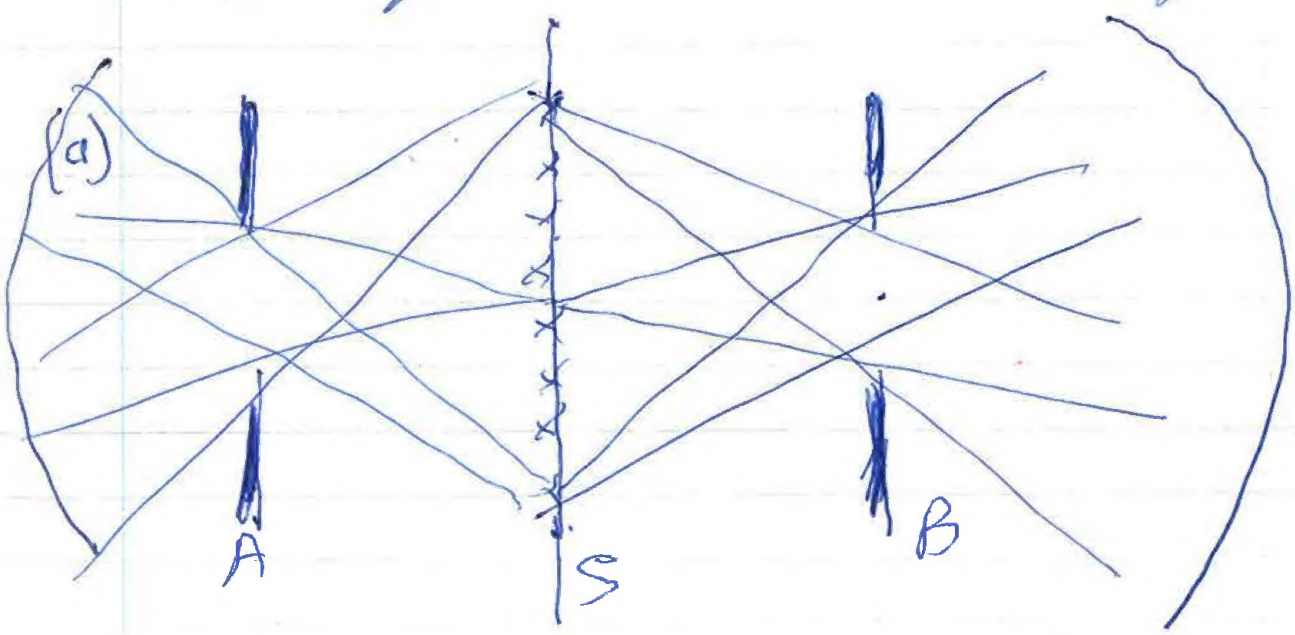
Can Experiment refute the Copenhagen Interpretation

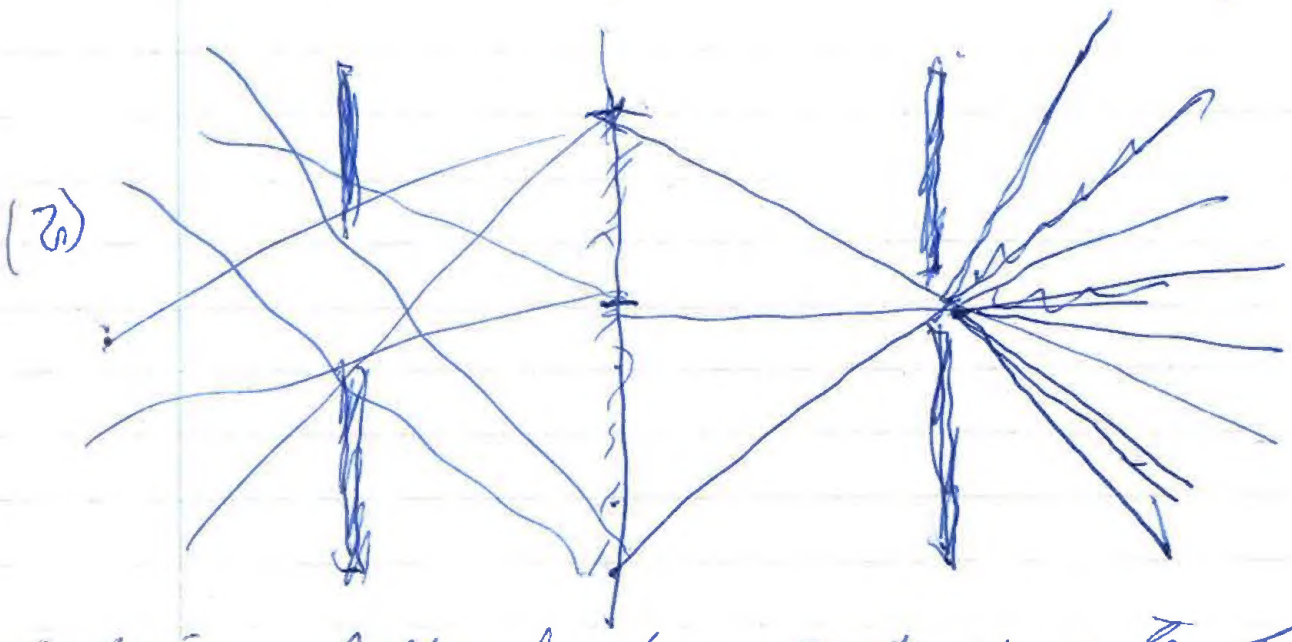
1. 2 senses of interpretation 1 & 2.

2. Interpretation 2's cannot be destinguished by experiment

3. Start Nonrealisty (1 & 2)' { agent-state of 1 & 2
   non-agent-state of 1.

4. Renninger experiment — Interesting Geometries-





Conclusion Popper has done a great service to the friends of QM by emphasizing the destinction between measurement and state preparation, and by spot-lighting the attention to the dogmatic Copenhagen philosophy of the Copenhagenists. Because some detailed arguments are flawed, does not mean that his original thesis has not been abundantly confirmed.
